FINANCIAL.

The financial situation remains essentially inchanged; the week has been a quiet one. with money still abundant and borrowers making only modest demands. Some of our country readers have mistaken the statement that there is plenty of money within the more than 2000 bales of cotton were sold last week than on the week before, the supply of exchange was less scarce. The New York Herald reports: "The following were the rates of exchange on New York at the undermentioned of the contract o rates of exchange on New York at the undermentioned cities to-day: Savannah, buying ½, selling ¼; St Louis, 75 premium; Charleston casy, ½ ½ ¼ premium; Cincinnati very easy, buying par, selling 1-10; New Orleans—commercial, ¼; bank, 5-16, and Chicago, 60 premium." Gold was again 104½ and 104¾ in New York up to noon; here 104¼. The Louisville Journal reports more "gilt-edge" paper wanted; 7628 per cent is offered. The St. Louis Globe says bankers are getting less paper than they says bankers are getting less paper than they want. The Cincinnati Enquirer says borrowcial surplus of loannible funds. The Chicago Tribune speaks of light offerings of paper and increase of loanable funds among the

COTTON. Our weekly review of the cotton market at the end of the last commercial week, quoted midding cotton in New York at 115 c, it dewith Turkey. England does not know that Turkey will accept the terms offered, if any can ultimately be permanently agreed upon, for the Porte is disposed to be very independent in his way of proceeding, while the attitude of Mohammedan populations is threatening in the extreme. Monta tions is threatening in the extreme. Monte negro, in the meantime, shows a determina-tion to renew the straggle unless the Turks accept their terms. Russia is giving material aid to that State, and Herzegovina appears likely to make common cause with her. As spring appears, in short, the belligerent sym-pathies increase, and warlike reports and continued uncertainty destroys confidence. arouses caution and weakens credit, thus rob-bing commerce of its foundations and injuring trade everywhere. Cotton has its full share of the difficulty and decreases in mar-ket value. The last review of the New York Bulletin said: "Matters have gone from bad to worse, and during the past week a feeling of demoralization, bordering at times upon panic, has been the characteristic feature of our cotton market. Several desperate attempts have been made to stay the decline, but with never more than momentary success, the inherent weakness paralyzing all efforts in behalf of sellers, and soon starting the shrinkage on values again with appar greater force than ever. The utter indifference of exporters, a very light demand from spinners, the full and increasing stock and accumulating expenses, coupled with weak southern markets and a steady downwar course of Liverpool, are in brief the cause tending to produce the result named above Holders of actual supplies and owners of contracts along the entire line have, eithe through disgust at the outlook or inability t carry further, unloaded right and left, an the weight of long cetten has been greate than at any time during the present season For future delivery there has been gree activity, with an excited, feverish tone, an almost hourly changes in value during the entire week, but a steady working to ower range and one or two unusually sharp

ern account, from western account and from local account, under a raid to get rid of cotton at all hazards, and after every little temporary steadiness the pressure would become all the greater from the supplies of operators who had purchased on the belief that the reaction was about to banks, supposing it to mean that everybody could get plenty of money out of the banks. That is an error, for paper is closely scrutinized before being accepted. The new interixed before being accepted. The new interest law appears to be a nullity at present, for we hear of no variation in rates. Exchange was in moderate supply and demand at par suring upon New York and for eastern derailed by the same paper said on Wednesday: "The continued absence of movement of actual cotton and the weak consight by discount, selling at he premium; eastern sight by discount, selling at he premium; more than 2000 bales of cotton were said base that the decline in silver in Europe, which movement of actual cotton and the weak con-dition of the foreign markets are still the general influences, but, in addition to-day, there is the decline in silver in Europe, which unsettled exchange and further demoralized Manchester." The New York Record of Friday stated, speaking of the dull state of trade in Manchester, England: "The contin-ued uncertain state of affairs in the east was still the great cause of depression of trade

ite in the way of a settlement of this vexed question takes place there seems to be but little prospect of any real revival."

Receipts in Memphis during the official week aggregated 2615 bales, against 4215 bales the previous week, and 8584 bales the corresponding week last season. The total receipts since September 1, 1876, are 364,153 bales, against 445,219 bales at the corresponding time last season, showing a decrease of 31,066 bales.

Shipments during the official week aggregated 4607 bales, against 5489 bales the previous week, and 14,873 bales the correbanks, with general business duff. again spiritless. The telegrams brought no important changes of price, but the markets were everywhere dall and easy. In our market only fine, nice cotton was in active demand, but the holders of it had generally higher views than buyers, and they kept their reproductive covering the covering their april deals and others changing maturing contracts into future months, together with the quite liberal shipments of midding cotton in New York at 115gc, it declined by the end of the week to 112gc; New Orleans quoted 114gc and declined to 11c. Liverpool quoted 6.5-16d and declined to 64gd; Memphis quoted 11c and so remained. We see by this statement that the drooping position we mentioned last week has not changed for the better, and that cotton has been falling. There has been no strength in the markets, the position of things in Europe is bad and scriously affects consumption and manufacture of cotton goods. In Germany there is distress in the manufacturing cities that amounts to actual famine in the district of Silesia, and a panic appears to threaten. In England fluctuating values of silver disturb the eastern trade, the home trade is dull, and over all Europe still hovers the dread of war. Russin is not satisfied with the terms England would be willing to make with Turkey. England does not know that Turkey will accept the terms offered, if any

GENERAL TRADE.

The business of last week, especially the latter part of it, was dull, for the heaviness of cotton has a depressing effect upon every-thing, and the fine weather is keeping farm ers at home planting. Corn was in fair de-mand yesterday, with sales of 665 sacks of shelled at 48c; 175 sacks, in poor sacks, at 48c; 120 sacks, ear corn, at 49c; and 200 sacks at 49½c; in store, 52@55c. Oats have been in moderate offering during the week, sale of 70 sacks of light mixed at 43c; in store, 53@55c. Bran is in request, and orders sent west have been responded to by telegrams, reporting inshibit to fell for went telegrams, reporting inability to fill for want of stock; sale of 50 sacks from a jobber at \$20; in store, \$1@1 05. Hay—nothing doing, sales last week of prairie at \$8 50@9, common \$10 50@11, fair \$12@13, prime \$15. Cornmeal has been unsettled and drooping, with sales yesterday at \$2 35@2 40, \$2 42½ was also obtained; the New Orleans Picayune, of Saturday, reported commend firm at \$2 45@2 50, dealers jobbing at \$2 75; the St. Louis Globe-Democrat, of Saturday, reports \$2 15@2 25 a barrel, delivered. Potatoes are quiet but remain in an uncertain position, warm weather and sprouting are close at hand, and give small chance for firmness; the market is too irregular for absolute quotations, but we hear of some early rose in first hands at \$2.75, and jobbing from store, early rose at \$3; russets, \$3 25; peachblows, \$3 25@3 40. A distinguished physician of New York says:

"It is astonishing how universally Dr. Tutt's Pills are used. In my daily rounds, I hear of them not only among the poor, but their virtues are heralded from the mansions of the wealthy and refined. Knowing the inventor from his long connection with the medical profession, I have great confidence in their merits, and of late have often prescribed them with the happiest results in cases where I desired to make a decided impression on the liver."

THE NEW Domestic Sewing Machine.

WHAT IT IS. It is the most powerful and durable, the lightest-running, and most silent Machine of its kind made. Power.—The application of force directly over the needle insures ample power, and enables it to go through the heaviest work with ease.

Purability.—All the working parts are thor-oughly hardened, and so adjusted that lost motion can be readily taken up.

Ease of Action.—The simplicity of its ma-chinery, the few hearings and points of friction, and the absence of all cams and gear-wheels, give it a light, easy action that requires but little motive power. Ower.

Quictness.—There are no cogs to rattle, no cams or points of friction to rub and grind. Every piece of its simple machinery moves in the most perfect mison, and with such case that makes less noise

WHAT IT WILL DO. t will sew the heavlest work. I makes a strong and durable seam with the locktitch.
It will cross seams of any thickness with the greatest ease.
It will do all kinds of work without a change of tension, and without skipping stitches or breaking thread. It will do more work with less labor than any other machine. G. W. FISHER, Gen'l Agent. G3 Madison street.
